Where to Find Information

Ryan needs help with a math problem at school.

Who could he ask for help?

Suggestions:

1. Print out pages 2 through 17
2. Laminate pages (for durability if needed)
3. Modify based on the needs of the student (see options below):
 - Cut off images and use only lines for writing
 - Keep the images as a reference but have the student write down the answer
 - Let students circle an image instead of writing it down
 - Cut off and velcro images for students to select the correct answer and place on the page
4. Put the pages into a folder or binder.
